

=> API Gateway entry point
 registered (client) -> service registry (Eureka server).

Redis cache :

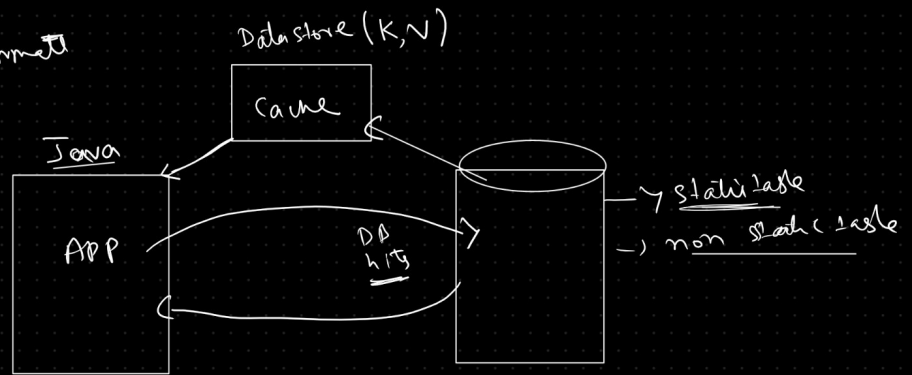

=> Cache & why cache
 Redis cache
Redis cache integration with a SB Application

① Cache :-

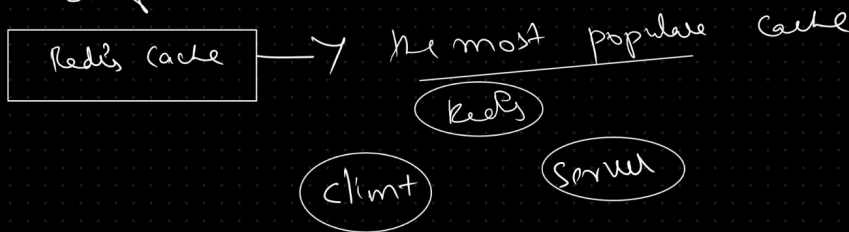

-> Temporary storage
 -> Data in key-value format

-> no. of DB hits will be reduced

-> using cache the performance of the App will increase

Cache => Zennidive

=> JDBC => sometimes perform opn

Hibernate
 -> connection
 -> Hibernate Template
 ↓
opn

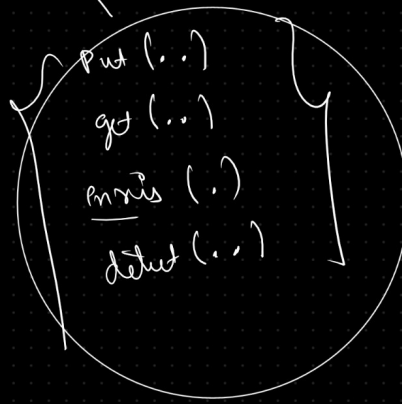

DataSource
 JDBC Template
 ↓
 ≡

starter - redis

Redis :-

- ① JedisConnection Factory => It represents connection with Redis server
- ② RedisTemplate -> perform operation with Redis server
- ③ OpsforHealth -> Based on Health
